

This machine could transfer colorful photos, words on cap, suitable for producing gifts, decorations.

Specification:

- 1. Digital controller, more accurate**
- 2. Swing-away design makes using more easy**
- 3. Easy to adjust the pressure**
- 4. Heating board more safe and durable**

Coralgraph Cap Press Machine

Usage

- 1. Place printing material on working table, get right pressure you need take out material**
- 2. Turn on power, about 10 sec then you could set Controller to get right temp and time you need**
- 3. Then the machine will heating up (200 about 15 minutes)**
- 4. After machine reach temp you set, then place cap on the working table flatly, place the photo you printing on cap, then press down the handle. When the machine reach the time you set, it will alarm, you could take out the cap and peel off the paper, then photo will transfer on the cap.**

! Attention

If the paper is cold peel, then you need to wait 15-20 sec and peel off paper. If it is hot peel, then you need to peel off paper at once after printing. (had better peel paper in diagonal line)
Successful printing needs right time, temp and pressure, You need to test printing to get right time and temp first

Problem and solve

Machine not working
